Full Stack web Developer(MERN)

SUMMARY

- * Self-independent, reliable and friendly individual who works hard to achieve his goals
- * Adaptable quickly, and organized well. Interested in learning the latest web & software technologies quickly.
- * Able to work well in teams as well as individually. My future goal is to become a senior full-stack developer.

EMPLOYMENT HISTORY

WORK EXPERIENCE

December 2018 - Present

Management Information System at Dolphin Die Cast (P) Ltd, Bangalore

1.Data Collection: MIS collects data from various sources within an organization. This data can be generated internally (e.g., sales records, employee performance data) or obtained externally (e.g., market research, industry reports).

2.Data Processing: The collected data is processed to convert it into meaningful and useful information. This may involve data transformation, aggregation, and analysis to produce reports, summaries, and dashboards.

3.Information Presentation: MIS presents information to users in various formats, such as reports, charts, graphs, and dashboards. Visualization tools help make complex data more understandable.
